A Text Atlas of Nail Disorders rusmedserv com
December 17th, 2019 - A Text Atlas of Nail Disorders Techniques in Investigation and Diagnosis Third edition Robert Baran MD Nail Disease Centre Cannes France Rodney PR Dawber MA MB ChB FRCP Consultant Dermatologist Churchill Hospital Oxford UK Eckart Haneke MD Klinikk Bunaes Sandvika Oslo Norway Antonella Tosti MD Associate Professor of Dermatology

Videocapillaroscopic Alterations in Alopecia Areata
April 29th, 2013 - Alopecia areata AA is a common hair disorder observed in dermatological practice however the exact mechanisms that lead to the hair loss are still unknown Disturbances in the blood supply of hair follicles may be one of the elements in the complex pathogenesis of AA Nailfold videocapillaroscopy is a noninvasive technique that allows

Position article and guidelines 2018 recommendations of
December 16th, 2019 - Nailfold capillaroscopy NFC is a reproducible simple low cost and safe imaging technique used for morphological analysis of nail bed capillaries It is considered to be extremely useful for the investigation of Raynaud’s phenomenon and for the early diagnosis of systemic sclerosis SSc The capillaroscopic pattern typically associated

Contribution of Nail Fold Videocapillaroscopy in Patients
December 17th, 2019 - CONCLUSIONS Nail fold capillaroscopy assessment can provide further information and has diagnostic value in some cases of early arthritis Nail fold capillaroscopy assessment contribution to the differential diagnosis in patients with early arthritis is sometimes significant especially in poorly clinical and immunological defined cases
**Microvascular Changes in Systemic Sclerosis Diagnosis and**
December 15th, 2019 - Cutolo M Sulli A Secchi M E Olivieri M amp Pizzorni C The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases Assessing Microvascular Changes in Systemic Sclerosis Diagnosis and Management Authors Assessing Microvascular Changes in Systemic Sclerosis Diagnosis and Management

**Dermatoscopic assessment of nailfold capillary**
December 6th, 2019 - The difference between capillaroscopy scores was evaluated with Student t test or Mann–Whitney U test according to characteristics of score distribution The correlation between disease activity and capillaroscopy scores in the patient group was analyzed with Pearson or Spearman correlation tests where necessary

**The contribution of capillaroscopy to the differential**
December 24th, 2019 - The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases The direct observation of the microvasculature with capillaroscopy is useful both for an early diagnosis of connective autoimmune diseases in presence of RP and for functional studies

**Capillaroscopy SpringerLink**

December 16th, 2019 - The differential diagnosis of diffuse skin sclerosis and of Raynaud’s phenomenon and a practical approach to assessment The contribution of physiotherapists to early detection of inflammatory arthritis Speaker Church John Ireland NAILFOLD CAPILLAROSCOPY CHANGES REFLECT ENDOTHELIAL ACTIVATION AND INJURY IN PATIENTS WITH SYSTEMIC
The differential effects of EPA and DHA on cardiovascular
May 1st, 2011 - This review will explore the differential effects of EPA and DHA in human subjects and relate it to possible molecular mechanisms. Effects of EPA and DHA on plasma lipid and lipoprotein metabolism. Dyslipidaemia specifically hypertriglyceridemia hypercholesterolemia and or a low HDL cholesterol level is a major risk factor for development of atherosclerosis and CVD.

Contribution of Nail Fold Videocapillaroscopy in Patients
March 14th, 2019 - Nail fold capillaroscopy assessment can provide further information and has diagnostic value in some cases of early arthritis. Nail fold capillaroscopy assessment contribution to the differential diagnosis in patients with early arthritis is sometimes significant especially in poorly clinical and immunological defined cases.

The contribution of capillaroscopy to the differential
December 20th, 2019 - Read. The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases. Best Practice & Research Clinical Rheumatology on DeepDyve, the largest online rental service for scholarly research with thousands of academic publications available at your fingertips.

The role of capillaroscopy in differentiation of primary
December 22nd, 2019 - The purpose of this study is to study and systematize the current knowledge about the role of capillaroscopy in differentiation of primary and secondary Raynaud’s phenomenon RP in rheumatic diseases. This method is a review of the literature.

Successful Immunosuppressive Treatment of Dermatomyositis
December 20th, 2019 - Vascular involvement is often present in dermatomyositis DM. Severe nailfold capillaroscopy NC findings have been described but their association with disease activity and or response to treatment have rarely been investigated. A 40 year old man presented 6 months earlier for arthromyalgias asthenia fatigue and muscle weakness.
Nailfold digital capillaroscopic findings in patients with

The contribution of capillaroscopy to the differential
October 14th, 2019 - The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases by primary RP can detect the earliest signs of the transition to secondary RP and thus screening procedures for further differential diagnosis within connective autoimmune diseases can be undertaken

Methods for the morphological and functional evaluation of
January 29th, 2001 - Methods for the morphological and functional evaluation of microvascular damage in systemic sclerosis Methods for the morphological and functional evaluation of microvascular damage in Secchi ME Olivieri M Pizzorni C The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases

Nailfold capillaroscopy relevance to the practice of
April 26th, 2014 - Nailfold capillaroscopy is a simple low cost method that is extremely important in the evaluation of patients with Raynaud’s phenomenon and of patients with systemic sclerosis SSc spectrum diseases Besides its importance for the early diagnosis of SSc nailfold capillaroscopy is a useful tool

The Israel Medical Association Journal IMAJ July 2019
December 22nd, 2019 - Current evidence suggests a contribution of the innate immune system in ALS with a role of microglial cell activation at the sites of neurodegeneration The median time from symptom onset to diagnosis of ALS is 14 months and this time estimate is mainly based on specific clinical signs and exclusion of ALS like conditions

The role of nail videocapillaroscopy in early diagnosis of
October 20th, 2019 - Read The role of nail videocapillaroscopy in early diagnosis
Assessing microvascular changes in systemic sclerosis
August 9th, 2010 - Microvascular damage and dysfunction represent the earliest morphological and functional markers of systemic sclerosis SSc a progressive connective tissue disease characterized by vascular abnormalities and diffuse fibrosis in the skin and internal organs These early microvascular changes are

Chronic venous disease and the genetic influence Servier
December 18th, 2019 - The etiology and pathophysiology of chronic venous disease CVD have been intensively studied in the past decades The elucidation of mechanisms leading to CVD is a challenging task because acquired phenomena alone are presumably insufficient to explain the full clinical course of the disease

Do worsening scleroderma capillaroscopic patterns predict
December 17th, 2019 - Objective Assessment of associations of nailfold videocapillaroscopy NVC scleroderma patterns ‘early’ ‘active’ and ‘late’ with future severe clinical involvement in a systemic sclerosis SSc population Methods Sixty six consecutive patients with SSc according to the LeRoy and Medsger criteria underwent NVC assessment at baseline

CORE
August 17th, 2018 - In our microcirculatory laboratory we use intravital capillaroscopy IC plethysmography P and laser Doppler flowmetry LDF for examining acrosyndromes We combine LDF with venoarteriolar reflex test cold test and rewarming test to achieve more reliable diagnoses of acrosyndromes

Iron Lady A Case of Eosinophilic Fasciitis
December 26th, 2019 - differential diagnosis of other scleroderma like diseases Steroid therapy is the first line treatment of this disease as the main aim is the resolution of fibrotic manifestations in the tissues Treatment with prednisolone or its equivalent should be initiated with doses of 0.5 – 1 mg kg day that should be
PDF Clinical applicability of quantitative nailfold
December 14th, 2019 - Clinical applicability of quantitative nailfold capillaroscopy in differential diagnosis of connective tissue diseases with Raynaud’s phenomenon Article PDF Available in Journal of the Formosan Medical Association 112 8 482 8 · August 2013 with 1 094 Reads

Nail fold dermoscopy in collagen vascular disorders A

Clinical features of scleroderma like disorders A
November 1st, 2019 - title Clinical features of scleroderma like disorders A challenge for the rheumatologist abstract Systemic sclerosis SSc is characterized by vascular abnormalities fibrosis inflammatory changes and late stage atrophy obliterative vasculopathy

The Place of Nailfold Capillaroscopy Among Instrumental
January 31st, 2018 - The Place of Nailfold Capillaroscopy Among Instrumental Methods for Assessment of Some The main role of capillaroscopy is to provide
differential diagnosis between primary

An international SUrvey on non iNvaSive tecHniques to
December 17th, 2019 - Nailfold capillaroscopy was most frequently performed by the physician him herself using different types of equipment relating to availability. Most rheumatologists reported high levels of appropriateness for NVC in both clinical and research settings for global assessment and differential diagnosis of Rp. Other techniques were less used.

Transition from primary Raynaud’s phenomenon to secondary

Position article and guidelines 2018 recommendations of
November 23rd, 2019 - Nailfold capillaroscopy NFC is a Nailfold capillaroscopy is a method for the assessment of the microcirculation and represents a reliable tool for differential diagnosis between primary and secondary Raynaud’s another prospective study investigated the contribution of NFC to the assessment of the progression of individuals.

The contribution of capillaroscopy to the differential
December 9th, 2019 - Conclusions. Nail fold capillaroscopy assessment can provide further information and has diagnostic value in some cases of early arthritis. Nail fold capillaroscopy assessment contribution to the differential diagnosis in patients with early arthritis is sometimes significant especially in poorly clinical and immunological defined cases.

State of the art on nailfold capillaroscopy a reliable
December 21st, 2019 - Capillaroscopy is a non invasive and safe tool to morphologically study the microcirculation. In rheumatology it has a dual use. First it
has a role in differential diagnosis of patients with RP. Second, it may have a role in the prediction of clinical complications in CTDs.

**Progression of nailfold capillaroscopic patterns and**

November 17th, 2019 - Introduction. SSc is a connective tissue disease characterized by early microvascular damage and dysfunction and immune system activation as well as progressive fibrosis in the skin and internal organs. Nailfold videocapillaroscopy (NVC) is the validated technique to assess SSc microvascular damage and is useful for the early diagnosis and

**The contribution of capillaroscopy to the differential**

October 1st, 2018 - The contribution of capillaroscopy to the differential diagnosis of connective autoimmune diseases. By Maurizio Cutolo, Alberto Sulli, Me Secchi, M Olivieri, and Carmen Pizzorni. No static citation data.

**Prof Ariane Herrick Publications**

**Frontiers Aminaphtone Efficacy in Primary and Secondary**

April 3rd, 2019 - Objectives. The aim of this six month open feasibility study was to evaluate skin blood perfusion and clinical symptom changes during aminaphtone treatment in patients with either primary or secondary Raynaud’s phenomenon to systemic sclerosis. Methods. Ninety-two patients referring for Raynaud’s phenomenon have been enrolled in November during.

**Quantitative nailfold capillary microscopy findings in**

**Capillaroscopic pattern in inflammatory arthritis Europe**
April 24th, 2016 - The role of capillaroscopy in early arthritis has not been studied and discussed in the current rheumatologic literature including in the aforementioned EULAR recommendations. Analysis of the current literature demonstrated that there are limited data about the role of nailfold capillaroscopy in inflammatory arthritis.

**Contribution of laser Doppler flowmetry with**
November 30th, 2019 - Contribution of laser Doppler flowmetry with venoarteriolar reflex cold and rewarming testing and intravital capillaroscopy to diagnose Raynaud's phenomenon. Jan Zeman 1 Oksana Turyanytsya 1 Vojtěch Kapsa 2 Mojmír Eliáš 3 1Department of Clinical Cardiology and Angiology, Hospital Bulovka 2 Charles University in Prague.
